

Progress report week 7

in this week we added we add a Rating field to each task, which represents the customer rating for that product. We also define a filterTasks function that takes in a minimum and maximum price range, as well as a minimum and maximum rating, and returns a new slice of tasks that fall within those criteria.

Aman and Meirzhan: they took filtering items based on price they also defined the endpoints for our API. We'll have endpoints for filtering items based on price.

Yermurat and Imangali: they took section rating field to each task.
