First of all, as a team we thought about our project, and what we will do through the semester. For the first week progress we got acquainted with new for us language, added basic things. We have two HTML files, one is index.html and second one is form.html. For the form.html we added two inputs for name and address. And our main.go file, with 3 functions. Responsibilities for first progress:

Aman - did helloHandler function in main.go file

Yermurat - did main function in main.go file

Meiirzhan - did formHandler function in main.go file

Imangali - did form.html file
